Pedro Henrique Assunção Pereira

Frontend Developer (React) | TypeScript | Data Visualization | Test Automation

Teresina, PI, Brazil | phap9060@gmail.com | linkedin.com/in/phap9060

SUMMARY

Frontend Engineer with 5+ years of continuous, hands-on experience in JavaScript, TypeScript and React single-page applications, building high-performing, maintainable UI components and chart-heavy interfaces used in production. Strong focus on testing and quality (Cypress, Playwright, Jest, React Testing Library), performance and clean architecture, working closely with design, product and backend teams. Postgraduate degree in Software Engineering and advanced English.

PROFESSIONAL EXPERIENCE

Vetta — Full Stack Engineer (JavaScript)

Feb 2025 – Present

- **Data visualization:** build and maintain **interactive charts and data visualizations** in an international steel industry product, rendering millions of data points simultaneously, with attention to rendering performance, responsiveness, readability and usability of complex datasets.
- **UI components:** develop **reusable React and TypeScript components** and libraries, with micro frontends and system design principles, translating UI/UX designs from the design team into responsive, accessible interfaces with HTML5, CSS3, SASS and CSS-in-JS (Styled Components).
- **Performance and scalability:** optimize speed and scalability with code splitting, lazy loading, memoization and Core Web Vitals, using Next.js (CSR, SSR, SSG) where it fits, and diagnose bottlenecks together with the backend team through REST APIs.
- **Automated testing and QA:** own test automation with **Cypress, Playwright, Jest, Vitest and React Testing Library**, writing and maintaining test scripts and integrating them into **CI/CD** pipelines to keep quality consistent and reliable.
- **Collaboration:** work closely with designers, product managers and engineers, run and take part in code reviews, uphold coding standards and mentor junior developers; manage state with TanStack Query, Redux and Zustand.

Raro Labs — Full-Stack / Frontend and Mobile Developer

May 2022 – Jan 2025 (2 projects)

- **Project 1 — DUcash, React Native app (May 2022 – Aug 2023):** developed and evolved the mobile app with **React Native and TypeScript**, React Query and Redux, focusing on performance and accessibility, with automated tests (Jest, React Testing Library) and integration with microservices via synchronous and asynchronous REST APIs.
- **Project 2 — Tele Sena, React and Next.js (Sep 2023 – Jan 2025):** worked on a large-scale, high-traffic online sales platform (e-commerce), building web applications with **React and Next.js** (SSR and SSG), responsive and accessible interfaces and PWAs, with Node.js and AWS (Lambda and EC2), code reviews and pull requests. Monitored the application in production with **Datadog and New Relic**.

Raro Academy — Frontend Instructor (Jun 2023 – Sep 2023)

- Taught React in a technical course, adapting explanations to different knowledge levels.

ConsuTI — Frontend and Mobile Developer

Jan 2021 – Mar 2022 | Teresina, Brazil

- Built a React platform and mobile solutions with complex state management and performance optimization, collaborating across teams.

EDUCATION

- Descomplica Faculdade Digital — Postgraduate Degree in Software Engineering | 2023 – 2024
- Raro Academy — Integrated Technical Course in Web and Mobile Development | 2022
- UNINOVAFAPI — Bachelor's Degree in Civil Engineering | 2015 – 2019

Languages: English (advanced) | **Work mode:** remote
